CONTACT_NETWORK

I design and build software products end to end: user-facing interfaces, authentication, data models, payment flows, and deployment. Each featured product below documents the problem, implementation choices, and engineering tradeoffs behind it.

My professional customer-service background strengthens how I build: I translate complex requirements into clear workflows, troubleshoot under pressure, and communicate in English and Spanish with ownership through resolution.

- Three software products: interactive learning, restaurant operations, and personal finance
- Production concerns: integer money, idempotent webhooks, auth, and user-scoped data
- Professional communication: bilingual support, problem resolution, and team enablement

JAVASCRIPT · TYPESCRIPT · REACT · NEXT.JS · SVELTEKIT · TAILWIND

## BACKEND

NODE.JS · REST_APIS · SSR · BETTER-AUTH · STRIPE

## DATA

MONGODB · POSTGRESQL* · R2 / S3

*TODO: remove if it does not apply.

## TOOLS

GIT · GITHUB · VERCEL · DOCKER* · CI/CD · VITE

# _PROFESSIONAL_BACKGROUND

// WORK + DEV_JOURNEY

### SUBJECT MATTER EXPERT & DIGITAL CUSTOMER SERVICE — TELEPERFORMANCE

SEP 2023 — PRESENT

BILINGUAL SUPPORT · COMPLEX PROBLEM RESOLUTION · TEAM ENABLEMENT

- Resolve complex customer issues for a pharmaceutical client and guide team members as a Subject Matter Expert.
- Maintain clear bilingual written communication and strong client-satisfaction outcomes in a fast-paced environment.
- Apply analytical problem solving, user empathy, and ownership through resolution to software work.

### INDEPENDENT SOFTWARE DEVELOPMENT — FEATURED PRODUCTS

TODO: 2024 — Present

SVELTEKIT · REACT/NEXT.JS · NODE · MONGODB

- Architected and built three product-grade web applications, each documented with product problem, architecture, tradeoffs, and retrospective.
- Work spans interactive learning, multi-tenant commerce, fiscal workflows, authentication, and personal-finance tools.

> EDUCATION

**Self-taught Web Development**

TODO: 2024 — Present

TODO: courses/docs used in one line (e.g. MDN, SvelteKit/Next.js docs, freeCodeCamp).

> CERTIFICATIONS

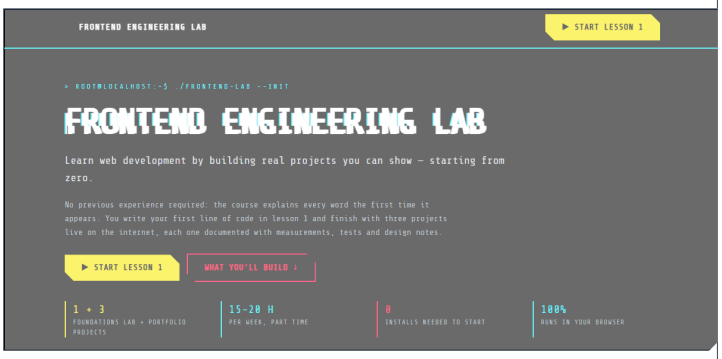

TODO: e.g. AWS / Meta / Google cert — or delete block

# _FEATURED_SOFTWARE_PRODUCTS

// FILES FOUND: 03

A selection of independently developed software products. Each case study covers the user problem, system architecture, engineering tradeoffs, and what I would improve next.

SYS.DAT // 0x01A4 STATUS: ACTIVE

Interactive learning product

## AVENDCODES

SOLE DEVELOPER & PRODUCT ARCHITECT

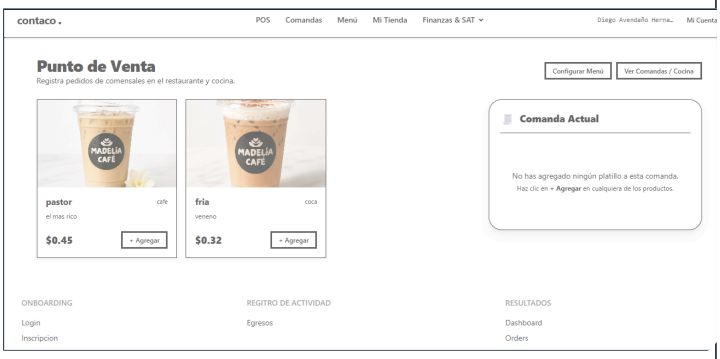

An interactive, zero-setup course that teaches JavaScript, DOM, Canvas 2D and core data structures by building a real Pixel Art Editor — 100% in the browser, no install.

- Sandboxed code execution
- Lesson content delivery
- Local progress persistence

SVELTEKIT JAVASCRIPT CODEMIRROR_6 TAILWIND_V4

OPEN_CASE_FILE

SYS.DAT // 0x02B7 STATUS: ACTIVE

Multi-tenant restaurant operations SaaS

## CONTACO

SOLE DEVELOPER & SOFTWARE ARCHITECT

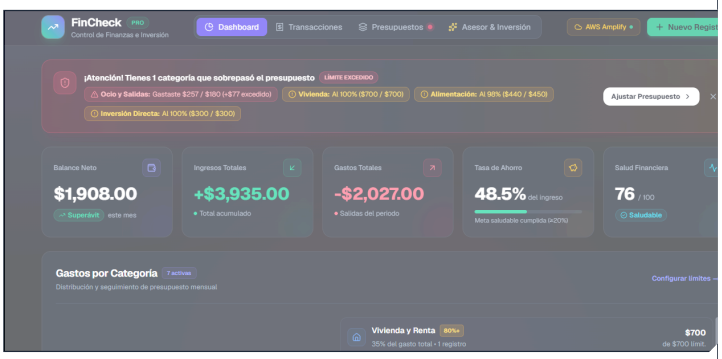

A multi-tenant SvelteKit app unifying in-store POS, commission-free online ordering with Stripe, expense tracking, and SAT-ready RESICO fiscal estimates for small Mexican restaurants — money in integer cents, never floats.

- POS and online ordering
- Idempotent Stripe payments
- SAT-ready fiscal estimates

SVELTEKIT MONGODB STRIPE CLOUDFLARE_R2

OPEN_CASE_FILE

SYS.DAT // 0x03C9 STATUS: ACTIVE

Personal finance web application

## FINCHECK

FULL-STACK DEVELOPER

A personal finance dashboard that answers where your money goes, flags over-budget spending, scores financial health, and generates savings advice — migrated from AWS Amplify Gen 2 to self-hostable Better Auth + MongoDB.

- Budget monitoring
- Financial health scoring
- Self-hostable authentication

## CONTACT_TERMINAL

Available to discuss software engineering and product development opportunities. I bring hands-on product delivery together with clear, bilingual customer communication and ownership through resolution.
